

**Flex Fuel Content Sensor Stainless Bracket w/ Vibration Absorption Mounting**

This 2-piece bracket is designed to assist in mounting Continental "small" type sensors. Rubber grommets supplied are designed to absorb any vibrations as well as affix sensor to any flat surface with mounting holes 60mm apart.

**Bolt Mounting Measurements:**

**Grommet Install Instructions:**

1. Remove metal insert.

2. Squeeze rubber to insert into assembled 2 part bracket.

3. Push one side through to clear rubber lip.

4. Push other side through with blunt tool.

5. Reinstall metal insert to complete.
